Sections

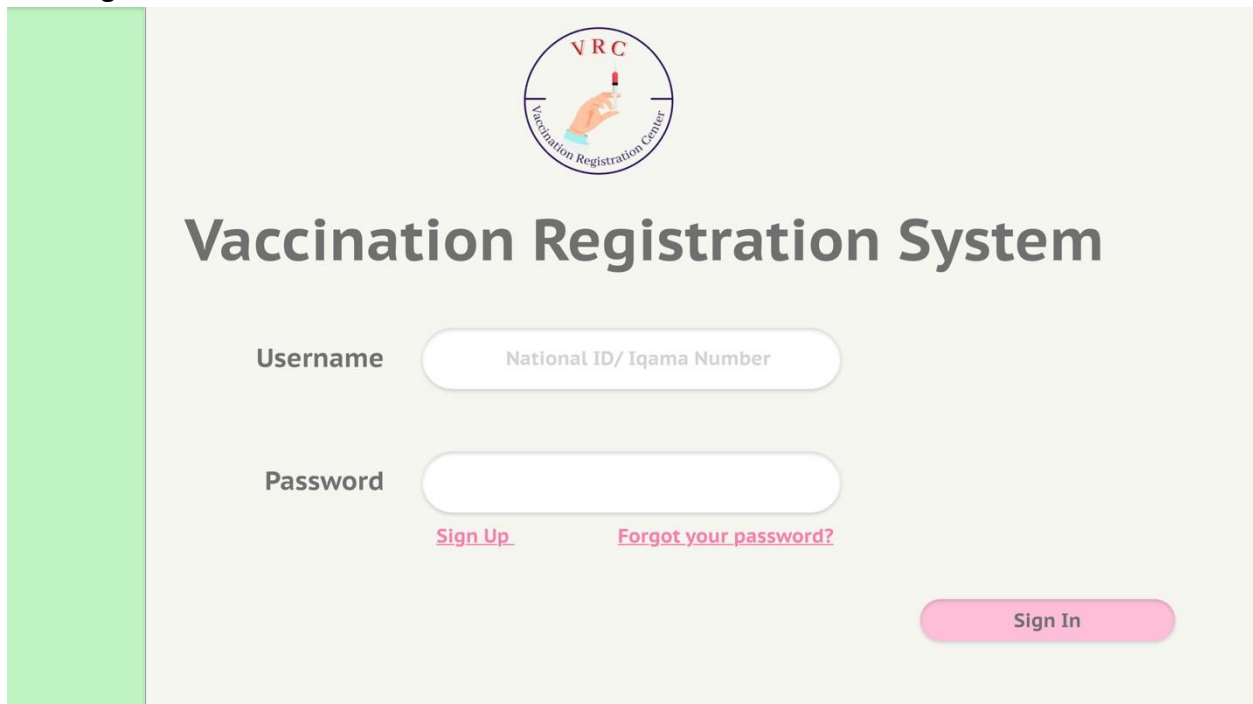

Attributes	Description	Data Type	Allow Null
centerID(FK)	Medical Center's id	VARCHAR(12)	-
A	Letter of the first section in the medical center	Char (1)	-
B	Letter of the second section in the medical center	Char(1)	-
C	Letter of the third section of the medical center	Char(1)	-

Schema:

GUI Design :

The GUI design for the Vaccination Registration System features a light beige background with a green vertical bar on the left. At the top center is the VRC logo, which includes a hand holding a syringe and the text 'VRC Vaccination Registration Center'. Below the logo, the title 'Vaccination Registration System' is displayed in a large, bold, dark gray font. The login section contains two input fields: 'Username' with a placeholder 'National ID/ Iqama Number' and 'Password'. Below the password field are two links: 'Sign Up' and 'Forgot your password?'. A pink 'Sign In' button is located at the bottom right of the form area.

At the beginning of the program, the sign-in interface will show to the users. They must enter their username (national id/ iqama number) and the password. If the users don't have an account, they can click on Sign up for new registration. Also, they can update their password in case they forget it.

Vaccination Registration System

First Name

Last Name **Birth Date**

National ID / Iqama **Address**

Email **Phone Number**

Gender ☐ Female ☐ Male

Nationality

In the case that a user needs to sign up a frame will pop up asking the user to input his/her information, like their first and last name alongside their national ID or Iqama number which will be used as their username when they need to login the system another time. Moreover, the user needs to enter their Email, Phone Number and address as well as selecting their gender from a button group and lastly a user has to select a nationality from a ComboBox. After the user fills all information, they can click on the signUp button and it'll take them to their profile page. In the case of a user not entering all information an error handling

procedure will take effect resulting a JOptionPane Error dialog that requires the user to enter all information

الدمام Dammam	الرياض Riyadh	مكة المكرمة Makkah
4	34	* 72
الجبيل Jubail	الاحساء Alahsa	القطيف AlQatif
3	3	4
القصيم Qassim	الظهران Dhahran	
1	1	

The home page's interface will display the current number of active and recovered cases, as well as the total death counts, one the right bottom corner a URL that connects to the official cases counter will be displayed, the user can navigate into any other page through the left

Symptom Analyser

Age :

Gender :

Any recent contact with Covid19 patients in the last 14 day ?

☐ Yes

☐ No

Submit

Result :

VRC

Are you having one or more of the following symptoms ?

☐ Fever

☐ Dry throat

☐ Shortness of breath

☐ Headaches

☐ Running nose

☐ None

Upon clicking the “Book an Appointment” button first thing that will show up is this page. In this page the user will be prompted to write in their age and gender, answer if they have been around a positive case in the last 14 days, and check the boxes corresponding to a symptom that they might be feeling at that moment. If the client answers “yes” to being in contact with a case, and checks one or more symptom, they will be denied a vaccine appointment and will be urged to go and get tested for Covid-19 for their and others’ safety.

FAQ's

-After getting a positive test how many days do I have to quarantine ?
7 days for immune adults, 10 days for unvaccinated adults and children under the age of 12

-Can I have all my vaccine shots in the same arm?
Yes

- How long should I wait between doses ?
At least 3 weeks

- What medical issues are more vulnerable to Covid-19 symptoms ?
The risk may also be increased in people of any age who have other serious health problems — such as heart or lung conditions, weakened immune systems, obesity, or diabetes.

This page showcases some frequently asked questions that might come up to users of the system regarding covid19 and its vaccine
